

# MAINTENANCE CHECKLIST FOR YOUR HVAC

Is your HVAC ready for the heat? Take a look at these tips from Kearney HVAC to add to your home maintenance checklist and keep your home comfortable and efficient all summer long!

## REPLACE YOUR AIR FILTERS

Air filters keep allergens and pollutants out of the air you breathe. This simple task is one of the easiest things you can do to improve your indoor air quality.

## CLEAR THE OUTDOOR CONDENSER FOR YOUR AC UNIT FROM DEBRIS

Your AC's condenser has been outside with the elements all winter. Make sure the unit is free from branches and other debris for efficient air flow and cooling.

## CONSIDER INSTALLING A SMART THERMOSTAT

Smart thermostats adjust to your routine and can also be accessed from anywhere so you'll never worry about leaving the AC running while on vacation again!

## GET ROOM BY ROOM CONTROLS WITH A DUCTLESS MINI SPLIT

If you have one room—or more—in your house that is also stuffy in the summer and cold in the winter, consider a ductless mini split heat pump.

## SCHEDULE AC MAINTENANCE FROM KEARNEY HVAC

Make sure your HVAC system is running efficiently and catch small issues before they become a bigger problem. Schedule your AC maintenance before North Shore really heats up to avoid costly breakdowns when you need it the most.

## UPGRADE YOUR OLD, INEFFICIENT AC

If your AC was having issues last year, it may be time for a replacement. Our team of experts can evaluate your system during our maintenance visit and guide you through the process of replacing your AC with a newer—and more efficient—model.

Now is the best time to make sure your HVAC is ready for the heat. Contact us to schedule AC maintenance today!
